## Preface

### Irrigation Management Technology Research Synopsis

Irrigation Management Technology was established in response to a request from the landscaping industry for trained technicians in the field of irrigation. The program is targeted toward training for the design, installation, operation, and maintenance of irrigation systems for lawn and turf areas such as golf courses, athletic fields, commercial enterprises, and homes.

Courses in the curriculum are based on the standards established by the Irrigation Association, a national organization representing irrigation manufacturers and their representatives, dealers, distributors, consultants, and contractors. Students completing the program will be qualified to sit for the association-sponsored exams for Certified Landscape Irrigation Auditor and Certified Golf Irrigation Auditor.

Articles, books, Web sites, and other materials listed at the end of each course were considered during the development process. *Irrigation and the Green Industry*, the Irrigation Association's journal, and *Lawn and Landscape Magazine*, a publication of the Melby Company, were especially useful in providing insight into trends and issues in the field. These references are suggested for use by instructors and students during the study of the topics outlined.

Industry advisory team members from Hinds Community College were involved in all stages of development of this curriculum, and they met periodically to review course content.

### Curriculum

The following national standards were referenced in each course of the curriculum:

- CTB/McGraw-Hill LLC *Tests of Adult Basic Education, Forms 7 and 8* Academic Standards
- *21<sup>st</sup> Century Skills*
- *Certified Landscape Irrigation Manager, The Irrigation Association*

### Assessment

Students will be assessed using the Mississippi CPAS Assessment for Irrigation Technology. Students will have the option of sitting for the Certified Landscape Irrigation Auditor examination and/or the Certified Golf Irrigation Auditor examination.

### Professional Learning

It is suggested that instructors participate in professional learning related to the following concepts:

- How to use the program Blackboard® site
- Differentiated instruction – To learn more about differentiated instruction, please go to [http://www.paec.org/teacher2teacher/additional\\_subjects.html](http://www.paec.org/teacher2teacher/additional_subjects.html), and select Differentiated Instruction. Work through this online course, and review the additional resources.

### Articulation

No articulated credit will be offered upon implementation of this curriculum by the college.

## Foreword

As the world economy continues to evolve, businesses and industries must adopt new practices and processes in order to survive. Quality and cost control, work teams and participatory management, and an infusion of technology are transforming the way people work and do business. Employees are now expected to read, write, and communicate effectively; think creatively, solve problems, and make decisions; and interact with each other and the technologies in the workplace. Vocational–technical programs must also adopt these practices in order to provide graduates who can enter and advance in the changing work world.

The curriculum framework in this document reflects these changes in the workplace and a number of other factors that impact local vocational–technical programs. Federal and state legislation calls for articulation between high school and community college programs, integration of academic and vocational skills, and the development of sequential courses of study that provide students with the optimum educational path for achieving successful employment. National skills standards, developed by industry groups and sponsored by the U.S. Department of Education and Labor, provide vocational educators with the expectations of employers across the United States. All of these factors are reflected in the framework found in this document.

Referenced throughout the courses of the curriculum are the 21<sup>st</sup> Century Skills, which were developed by the Partnership for 21<sup>st</sup> Century Skills, a group of business and education organizations concerned about the gap between the knowledge and skills learned in school and those needed in communities and the workplace. A portion of the 21<sup>st</sup> Century Skills addresses learning skills needed in the 21<sup>st</sup> century, including information and communication skills, thinking and problem-solving skills, and interpersonal and self-directional skills. The need for these types of skills has been recognized for some time, and the 21<sup>st</sup> Century Skills are adapted in part from the 1991 report from the U.S. Secretary of Labor’s Commission on Achieving Necessary Skills (SCANS). Another important aspect of learning and working in the 21<sup>st</sup> century involves technology skills, and the International Society for Technology in Education, developers of the National Educational Technology Standards (NETS), were strategic partners in the Partnership for 21<sup>st</sup> Century Skills.

Each postsecondary program of instruction consists of a program description and a suggested sequence of courses that focus on the development of occupational competencies. Each vocational–technical course in this sequence has been written using a common format, which includes the following components:

- Course Name – A common name that will be used by all community/junior colleges in reporting students
- Course Abbreviation – A common abbreviation that will be used by all community/junior colleges in reporting students
- Classification – Courses may be classified as:
  - Vocational–technical core – A required vocational–technical course for all students

- Area of concentration (AOC) core – A course required in an area of concentration of a cluster of programs
  - Vocational–technical elective – An elective vocational–technical course
  - Related academic course – An academic course that provides academic skills and knowledge directly related to the program area
  - Academic core – An academic course that is required as part of the requirements for an associate’s degree
- Description – A short narrative that includes the major purpose(s) of the course and the recommended number of hours of lecture and laboratory activities to be conducted each week during a regular semester
  - Prerequisites – A listing of any courses that must be taken prior to or on enrollment in the course
  - Corequisites – A listing of courses that may be taken while enrolled in the course
  - Competencies and Suggested Objectives – A listing of the competencies (major concepts and performances) and of the suggested student objectives that will enable students to demonstrate mastery of these competencies

The following guidelines were used in developing the program(s) in this document and should be considered in compiling and revising course syllabi and daily lesson plans at the local level:

- The content of the courses in this document reflects approximately 75 percent of the time allocated to each course. The remaining 25 percent of each course should be developed at the local district level and may reflect the following:
  - Additional competencies and objectives within the course related to topics not found in the state framework, including activities related to specific needs of industries in the community college district
  - Activities that develop a higher level of mastery on the existing competencies and suggested objectives
  - Activities and instruction related to new technologies and concepts that were not prevalent at the time the current framework was developed and revised
  - Activities that implement components of the Mississippi Tech Prep initiative, including integration of academic and vocational–technical skills and coursework, school-to-work transition activities, and articulation of secondary and postsecondary vocational–technical programs
  - Individualized learning activities, including worksite learning activities, to better prepare individuals in the courses for their chosen occupational area
- Sequencing of the course within a program is left to the discretion of the local district. Naturally, foundation courses related to topics such as safety, tool and equipment usage, and other fundamental skills should be taught first. Other courses related to specific skill areas and related academics, however, may be sequenced to take advantage of seasonal and climatic conditions, resources located outside of the school, and other factors.

- Programs that offer an Associate of Applied Science degree must include a minimum 15 semester credit hour academic core. Specific courses to be taken within this core are to be determined by the local district. Minimum academic core courses are as follows:
  - 3 semester credit hours                      Math/Science Elective
  - 3 semester credit hours                      Written Communications Elective
  - 3 semester credit hours                      Oral Communications Elective
  - 3 semester credit hours                      Humanities/Fine Arts Elective
  - 3 semester credit hours                      Social/Behavioral Science Elective

It is recommended that courses in the academic core be spaced out over the entire length of the program, so that students complete some academic and vocational–technical courses each semester. Each community/junior college has the discretion to select the actual courses that are required to meet this academic core requirement.

- Technical elective courses have been included to allow community colleges and students to customize programs to meet the needs of industries and employers in their area.

In order to provide flexibility within the districts, individual courses within a framework may be customized by:

- adding new competencies and suggested objectives.
- revising or extending the suggested objectives for individual competencies.
- adjusting the semester credit hours of a course to be up one hour or down one hour (after informing the State Board for Community and Junior Colleges [SBCJC] of the change).

In addition, the curriculum framework as a whole may be customized by:

- resequencing courses within the suggested course sequence.
- developing and adding a new course that meets specific needs of industries and other clients in the community or junior college district (with SBCJC approval).
- utilizing the technical elective options in many of the curricula to customize programs.

## Program Description

Irrigation Management Technology is designed to provide students with skills that lead to employment in residential and commercial irrigation industries. The program includes training in the areas of irrigation system design and installation, system troubleshooting and repair, and irrigation business and shop management. Students enrolled in the program have the options of taking a one-year course of study and receiving a technical certificate or taking a two-year course of study and receiving an Associate of Applied Science degree. A minimum of 42 semester credit hours is required to earn the technical certificate. A minimum of 72 semester credit hours is required to earn the Associate of Applied Science degree. Students who complete the program will be qualified to sit for the Certified Landscape or Certified Golf Irrigation Auditor's examinations after earning one year of experience in the field. Students will be qualified to sit for the Certified Irrigation Contractor and Certified Irrigation Designer examination after earning two years of experience in the field. Students may sit for the first two steps of the Certified Irrigation Designer examination upon completion of the program. The remaining steps (3 and 4) may be completed after obtaining two years of field experience.

Required courses for a technical certificate in Irrigation Management Technology include the following:

- 2 sch Introduction to Irrigation (IRM 1112)
- 3 sch Residential Irrigation Design (IRM 1123)
- 4 sch Irrigation Systems Installation I (IRM 1144)
- 3 sch Irrigation Systems Installation II (IRM 1243)
- 3 sch Irrigation Troubleshooting and Repair (IRM 1223)
- 3 sch Irrigation Pumps, Controls, and Relays (IRM 2233)
- 4 sch Botany/Botany Lab (BOT 1314)
- 4 sch Survey of Microcomputer Applications (CPT 1324)
- 3 sch Landscape Business Management (HLT 2313)
- 3 sch Landscape Construction (HLT 2713)
- 3 sch Spanish Conversation I (ATE 1213)
- 3 sch Green Industry Cost Estimating (HLT 2123 or IRM 2123)
- 2 sch Irrigation Auditing (IRM 2312)
- 3 sch Supervised Work Experience in Irrigation Management Technology (IRM 2923)

**Suggested Course Sequence\***  
**Irrigation Management Technology**  
**Associate of Applied Science Degree**

FIRST YEAR

2 sch Introduction to Irrigation (IRM 1112) 4 sch Irrigation Systems Installation I (IRM 1144) 4 sch Botany/Botany Lab (BIO 1314) 3 sch Written Communications Elective 2 sch Green Industry Seminar (HLT 1222) 1 sch Leadership Management (HLT 1411)	3 sch Irrigation Pumps, Controls, and Relays (IRM 2233) 3 sch Irrigation Systems Installation II (IRM 1243) 3 sch Fine Arts/Humanities Elective 3 sch Social Behavioral Science Elective 3 sch Approved Elective** 1 sch Leadership Management II (HLT 1421)
16 sch	16 sch

SUMMER TERM

3 sch Supervised Work Experience in Irrigation Management Technology (IRM 2923)

SECOND YEAR

3 sch Approved Computer Elective 3 sch Green Industry Cost Estimating (IRM 2123) 3 sch Oral Communications Elective 3 sch Approved Elective** 3 sch Spanish Conversation I 3 sch Humanities/Fine Arts Elective 1 sch Leadership Management III (HLT 1431)	3 sch Landscape Construction (HLT 2713) 3 sch Landscape Business Management (HLT 2313) 3 sch Irrigation Troubleshooting and Repair (IRM 1223) 3 sch Residential Irrigation Design (IRM 1123) 1 sch Leadership Management IV (HLT 1441) 2 sch Irrigation Auditing (IRM 2312) 3 sch Approved Elective**
19 sch	18 sch

\* Students who lack entry-level skills in math, English, science, and so forth will be provided related studies.

**\*\*APPROVED ELECTIVES**

Any IRM, HLT, or TEM course may be selected as an approved elective with faculty approval. Other approved electives include the following:

DDT 1413	Elementary Surveying
BOT 1433	Business Accounting or ACC 1213 Principles of Accounting
BOT 1313	Applied Business Math or BAD 1313 Business Mathematics
BAD 2413	Legal Environment of Business
PHY 1214	Survey of Physics

## Irrigation Management Technology Courses

**Course Name:** Introduction to Irrigation

**Course Abbreviation:** IRM 1112

**Classification:** Vocational–Technical Core

**Description:** An introduction to irrigation practices and technologies. Includes instruction in the history of irrigation, regions of water management, and the basic components of agricultural, large turf, golf, commercial, and residential irrigation systems (2 sch: 2-hr lecture)

**Prerequisites:** None

<b>Competencies and Suggested Objectives</b>
1. Describe the history of irrigation in the United States. <ol style="list-style-type: none"> <li>a. Identify early methods of irrigation.</li> <li>b. Identify key individuals in the development of irrigation systems.</li> <li>c. Discuss the development of key equipment and technological advances in irrigation.</li> <li>d. Establish a timeline showing the development of irrigation technologies.</li> </ol>
2. Identify practices for water management in different regions of the United States. <ol style="list-style-type: none"> <li>a. Examine reclamation acts dealing with water management and conservation.</li> <li>b. Discuss water rights issues associated with different regions in the U.S.</li> </ol>
3. Describe and contrast components and practices associated with different types of irrigation systems. <ol style="list-style-type: none"> <li>a. Describe methods and equipment for agricultural irrigation on large areas.</li> <li>b. Describe methods and equipment for irrigation large turf areas and golf courses.</li> <li>c. Describe methods and equipment for irrigation of commercial and residential systems.</li> </ol>

### STANDARDS

#### *Certification Standards for the Irrigation Association's Certified Irrigation Auditor Exam*

- IR3 Apply irrigation terminology.  
 IR5 Apply principles of irrigation management.  
 IR9 Evaluate water use in an irrigation system and schedule.

#### *Related Academic Standards*

- R1 Interpret Graphic Information (forms, maps, reference sources)  
 R2 Words in Context (same and opposite meaning)  
 R3 Recall Information (details, sequence)  
 R4 Construct Meaning (main idea, summary and paraphrase, compare and contrast, cause and effect)  
 R5 Evaluate and Extend Meaning (fact and opinion, predict outcomes, point of view)

- L1 Usage (pronoun, tense, subject–verb agreement, adjective, adverb)
- L2 Sentence Formation (fragments, run-on, clarity)
- L3 Paragraph Development (topic sentence, supporting sentence, sequence)
- L4 Capitalization (proper noun, titles)
- L5 Punctuation (comma, semicolon)
- L6 Writing Conventions (quotation marks, apostrophe, parts of a letter)
- S1 Vowel (short, long)
- S2 Consonant (variant spelling, silent letter)
- S3 Structural Unit (root, suffix)

Copyright © 1994 by CTB/McGraw-Hill LLC

---

### *21<sup>st</sup> Century Skills*

---

- CS1 Global Awareness
- CS2 Financial, Economic, and Business Literacy
- CS4 Information and Communication Skills
- CS5 Thinking and Problem-Solving Skills
- CS6 Interpersonal and Self-Directional Skills

**Course Name:** Residential Irrigation Design

**Course Abbreviation:** IRM 1123

**Classification:** Vocational–Technical Elective

**Description:** A course designed to teach students the proper techniques for designing irrigation systems to achieve an effective and efficient irrigation system (3 sch: 2-hr lecture, 2-hr lab)

**Prerequisites:** IRM 1143 Residential Irrigation Installation or HLT 2824 Irrigation and Lighting Systems and Installation, and college math

<b>Competencies and Suggested Objectives</b>	
1.	Describe and apply techniques for designing effective and efficient irrigation systems. <ol style="list-style-type: none"> <li>Identify the symbols used on irrigation design blueprints.</li> <li>Interpret blueprints and associated design specifications.</li> <li>Record in-field information, determine different hydrozones, and create a base plan.</li> <li>Determine design capacity for maximum flow rate.</li> <li>Determine correct sprinkler placement.</li> <li>Determine correct pipe layout and pipe sizing.</li> <li>Determine precipitation rates using industry charts.</li> <li>Apply principles of water conservation in irrigation system design.</li> </ol>
2.	Describe and apply principles of drip irrigation. <ol style="list-style-type: none"> <li>Describe the basic components of a drip system.</li> <li>Collect site data for irrigation drip systems.</li> <li>Apply the proper steps to design a drip system.</li> <li>Describe methods of zoning and piping of drip systems.</li> <li>Describe drip scheduling based on soil, plant, and water relations.</li> </ol>

## STANDARDS

### *Certification Standards for the Irrigation Association's Certified Irrigation Auditor Exam*

- IR1 Apply irrigation audit procedures and technology.
- IR2 Develop base schedules and scheduling for irrigation.
- IR3 Apply irrigation terminology.
- IR4 Apply soil characteristics and properties to irrigation systems and scheduling.
- IR5 Apply principles of irrigation management.
- IR6 Apply weather and atmospheric conditions to irrigation systems and scheduling.
- IR7 Apply plant anatomy and physiology to irrigation systems and scheduling.
- IR8 Perform site selection procedures for irrigation audits.
- IR9 Evaluate water use in an irrigation system and schedule.
- IR10 Adjust/modify irrigation schedules.

---

*Related Academic Standards*

---

- R1 Interpret Graphic Information (forms, maps, reference sources)
- R2 Words in Context (same and opposite meaning)
- R3 Recall Information (details, sequence)
- R4 Construct Meaning (main idea, summary and paraphrase, compare and contrast, cause and effect)
- R5 Evaluate and Extend Meaning (fact and opinion, predict outcomes, point of view)
- M1 Addition of Whole Numbers (no regrouping, regrouping)
- M2 Subtraction of Whole Numbers (no regrouping, regrouping)
- M3 Multiplication of Whole Numbers (no regrouping, regrouping)
- M4 Division of Whole Numbers (no remainder, remainder)
- M5 Decimals (addition, subtraction, multiplication, division)
- M6 Fractions (addition, subtraction, multiplication, division)
- M7 Integers (addition, subtraction, multiplication, division)
- M8 Percents
- M9 Algebraic Operations
- A1 Numeration (ordering, place value, scientific notation)
- A2 Number Theory (ratio, proportion)
- A3 Data Interpretation (graph, table, chart, diagram)
- A4 Pre-Algebra and Algebra (equations, inequality)
- A5 Measurement (money, time, temperature, length, area, volume)
- A6 Geometry (angles, Pythagorean theory)
- A7 Computation in Context (whole numbers, decimals, fractions, algebraic operations)
- A8 Estimation (rounding, estimation)
- L1 Usage (pronoun, tense, subject–verb agreement, adjective, adverb)
- L2 Sentence Formation (fragments, run-on, clarity)
- L3 Paragraph Development (topic sentence, supporting sentence, sequence)
- L4 Capitalization (proper noun, titles)
- L5 Punctuation (comma, semicolon)
- L6 Writing Conventions (quotation marks, apostrophe, parts of a letter)

**Course Name:** Irrigation Systems Installation I

**Course Abbreviation:** IRM 1144

**Classification:** Vocational–Technical Elective

**Description:** An introductory course on the installation of irrigation systems. Includes instruction in basic components, site inspections, blueprint interpretation, methods and procedures for installation, and lighting system installation (4 sch: 2-hr lecture, 4-hr lab) (HLT 2824 may be taken in lieu of this course.)

**Prerequisites:** None

<b>Competencies and Suggested Objectives</b>
1. Describe the basic components of an irrigation system. <ol style="list-style-type: none"> <li>a. Perform part identification of irrigation systems.</li> <li>b. Describe the basic components such as sprinkler heads, controllers, fittings, backflow preventers, manual valves, electrical valves, pipe and wire.</li> </ol>
2. Perform site inspections. <ol style="list-style-type: none"> <li>a. Collect information on-site.</li> <li>b. Perform pre-installation inspections.</li> </ol>
3. Interpret blueprints of general designs of an irrigation system. <ol style="list-style-type: none"> <li>a. Differentiate between commercial and residential irrigation systems.</li> <li>b. Determine the correct location of the sprinkler heads for even water distribution.</li> <li>c. Discuss nozzle sizing and precipitation rates.</li> <li>d. Differentiate between flow and pressure.</li> <li>e. Calculate the correct pipe sizes to reduce friction loss.</li> <li>f. Compare the efficiencies of spray, rotary, and impact drive heads.</li> <li>g. Explain static pressure, dynamic pressure, surge pressure, velocity, and friction loss on a simple irrigation system.</li> <li>h. Determine watering time needed per week depending on type of irrigation system and soil type.</li> <li>i. Discuss cross connection control.</li> </ol>
4. Describe the methods and procedures to follow in the installation of an irrigation system. <ol style="list-style-type: none"> <li>a. Discuss the layout of an irrigation system to include the use of necessary tools and equipment.</li> <li>b. Describe the installation process including pipe fitting, electrical components, starting and finishing points, system testing, and cleanup.</li> </ol>
5. Describe the types and basic components of outdoor lighting. <ol style="list-style-type: none"> <li>a. Discuss uses of landscape lighting.</li> <li>b. Identify and discuss basic components of an outdoor lighting system.</li> <li>c. Describe lighting techniques.</li> <li>d. Calculate voltage drop in a lighting system.</li> </ol>

## STANDARDS

### *Certification Standards for the Irrigation Association's Certified Irrigation Auditor Exam*

- IR2 Develop base schedules and scheduling for irrigation.

## STANDARDS

### *Certification Standards for the Irrigation Association's Certified Irrigation Auditor Exam*

- IR2 Develop base schedules and scheduling for irrigation.
- IR3 Apply irrigation terminology.
- IR5 Apply principles of irrigation management.
- IR6 Apply weather and atmospheric conditions to irrigation systems and scheduling.
- IR8 Perform site selection procedures for irrigation audits.
- IR9 Evaluate water use in an irrigation system and schedule.
- IR10 Adjust/modify irrigation schedules

### *Related Academic Standards*

- R1 Interpret Graphic Information (forms, maps, reference sources)
- R2 Words in Context (same and opposite meaning)
- R3 Recall Information (details, sequence)
- R4 Construct Meaning (main idea, summary and paraphrase, compare and contrast, cause and effect)
- R5 Evaluate and Extend Meaning (fact and opinion, predict outcomes, point of view)
- M1 Addition of Whole Numbers (no regrouping, regrouping)
- M2 Subtraction of Whole Numbers (no regrouping, regrouping)

- M3 Multiplication of Whole Numbers (no regrouping, regrouping)
- M4 Division of Whole Numbers (no remainder, remainder)
- M5 Decimals (addition, subtraction, multiplication, division)
- M6 Fractions (addition, subtraction, multiplication, division)
- M7 Integers (addition, subtraction, multiplication, division)
- M8 Percents
- M9 Algebraic Operations
- A1 Numeration (ordering, place value, scientific notation)
- A2 Number Theory (ratio, proportion)
- A3 Data Interpretation (graph, table, chart, diagram)
- A4 Pre-Algebra and Algebra (equations, inequality)
- A5 Measurement (money, time, temperature, length, area, volume)
- A6 Geometry (angles, Pythagorean theory)
- A7 Computation in Context (whole numbers, decimals, fractions, algebraic operations)
- A8 Estimation (rounding, estimation)
- L1 Usage (pronoun, tense, subject–verb agreement, adjective, adverb)
- L2 Sentence Formation (fragments, run-on, clarity)
- L3 Paragraph Development (topic sentence, supporting sentence, sequence)
- L4 Capitalization (proper noun, titles)
- L5 Punctuation (comma, semicolon)
- L6 Writing Conventions (quotation marks, apostrophe, parts of a letter)

**Course Name:** Irrigation Systems Installation II

**Course Abbreviation:** IRM 1243

**Classification:** Vocational–Technical Elective

**Description:** A continuation of IRM 1144 with emphasis on irrigation auditing and contracting procedures such as system installation, site inspection, uniform efficiency measures, and calculation of base watering schedules for a specific site (3 sch: 2-hr lecture, 2-hr lab)

**Prerequisites:** IRM 1144 Irrigation Systems Installation I or HLT 2824 Irrigation and Lighting Systems

<b>Competencies and Suggested Objectives</b>	
1. Install an irrigation system.	<ul style="list-style-type: none"> <li>a. Lay out positions of lines, heads, and controllers.</li> <li>b. Operate equipment to dig trenches.</li> <li>c. Install lines, heads, and controllers.</li> </ul>
2. Perform a site inspection.	<ul style="list-style-type: none"> <li>a. Operate an irrigation system.</li> <li>b. Inspect a system for damaged or faulty components.</li> <li>c. Repair or adjust components.</li> </ul>
3. Measure uniformity and efficiency of an irrigation system.	<ul style="list-style-type: none"> <li>a. Collect data on uniformity and efficiency of the system.</li> <li>b. Identify wet and dry spots in the system.</li> </ul>
4. Establish a base watering schedule.	<ul style="list-style-type: none"> <li>a. Determine precipitation rates for given areas.</li> <li>b. Identify water delivery rates and times for given plant demands.</li> <li>c. Adjust/program the system to the schedule.</li> </ul>

## STANDARDS

### *Certification Standards for the Irrigation Association's Certified Irrigation Auditor Exam*

- IR1 Apply irrigation audit procedures and technology.
- IR2 Develop base schedules and scheduling for irrigation.
- IR3 Apply irrigation terminology.
- IR4 Apply soil characteristics and properties to irrigation systems and scheduling.
- IR5 Apply principles of irrigation management.
- IR6 Apply weather and atmospheric conditions to irrigation systems and scheduling.
- IR7 Apply plant anatomy and physiology to irrigation systems and scheduling.
- IR8 Perform site selection procedures for irrigation audits.
- IR9 Evaluate water use in an irrigation system and schedule.
- IR10 Adjust/modify irrigation schedules.

**Course Name:** Green Industry Cost Estimating

**Course Abbreviation:** IRM 2123

**Classification:** Vocational–Technical Core

**Description:** A course designed to introduce budgeting and estimating fundamentals used in the landscape and irrigation industries (3 sch: 2-hr lecture, 2-hr lab) (Also taught as HLT 2123, Green Industry Cost Estimating)

**Prerequisites:** None

<b>Competencies and Suggested Objectives</b>	
1.	Describe business practices associated with estimating, bidding, and budgeting. <ol style="list-style-type: none"> <li>Discuss trends in the budgeting and estimating processes of the landscape industry.</li> <li>Describe the three parts of a bid.</li> <li>Discuss different types of budgets used in business.</li> <li>Demonstrate the ability to make decisions based on a profit–loss statement.</li> </ol>
2.	Develop a bid proposal. <ol style="list-style-type: none"> <li>Calculate field labor cost using industry standard ratios.</li> <li>Calculate average crew wages.</li> <li>Apply principles associated with general and administrative overhead costs.</li> <li>Calculate material labor cost using industry ratio formulae.</li> <li>Calculate net profit margins, gross profit margins, and break even point in an estimate.</li> <li>Calculate equipment cost for a budget.</li> <li>Prepare a formal bid proposal.</li> </ol>

## STANDARDS

### *Certification Standards for the Irrigation Association's Certified Irrigation Auditor Exam*

- IR3 Apply irrigation terminology.  
 IR5 Apply principles of irrigation management.  
 IR7 Apply plant anatomy and physiology to irrigation systems and scheduling.

### *Related Academic Standards*

**Course Name:** Irrigation Pumps, Controls, and Relays

**Course Abbreviation:** IRM 2233

**Classification:** Vocational–Technical Core

**Description:** A study of the basic function, operation, and maintenance of water pumps for irrigation systems. Includes instruction in determining pump size and providing backflow protection (3 sch: 2-hr lecture, 2-hr lab)

**Prerequisites:** None

<b>Competencies and Suggested Objectives</b>	
1.	Apply basic principles of operation for pumps. <ol style="list-style-type: none"> <li>Identify the components of a basic pump, and describe their function or operation.</li> <li>Identify the common types of pumps and their uses or applications.</li> <li>Interpret pump curve charts.</li> </ol>
2.	Select a pump to meet specifications for a given job. <ol style="list-style-type: none"> <li>Calculate the required total dynamic head for a system pump.</li> <li>Calculate horsepower needed.</li> <li>Determine impeller size for a given job.</li> </ol>
3.	Apply principles for selecting backflow prevention devices for a specific site. <ol style="list-style-type: none"> <li>Describe the different types of backflow prevention devices and their applications, installation, and operation.</li> <li>Select, install, and adjust a backflow device for a specific system.</li> </ol>
4.	Maintain pumps and backflow devices. <ol style="list-style-type: none"> <li>Demonstrate basic maintenance procedures.</li> <li>Protect a pump and backflow device from freeze damage.</li> </ol>

## STANDARDS

### *Certification Standards for the Irrigation Association's Certified Irrigation Auditor Exam*

- IR3 Apply irrigation terminology.
- IR5 Apply principles of irrigation management.
- IR6 Apply weather and atmospheric conditions to irrigation systems and scheduling.
- IR9 Evaluate water use in an irrigation system and schedule.

**Course Name:** Irrigation Auditing

**Course Abbreviation:** IRM 2312

**Classification:** Vocational–Technical Elective

**Description:** A course to prepare students to take the Irrigation Association’s Certified Landscape Auditor examination. Includes instruction on site inspection, system inspection, and tune-up of irrigation systems, data collection, base water scheduling, and irrigation management practices. Students will perform an audit following approved practices. (2 sch: 1-hr lecture, 2-hr lab)

**Pre/Corequisites:** IRM 1144 Irrigation Systems Installation I, IRM 1123 Residential Irrigation Design, and IRM 1223 Irrigation Troubleshooting and Repair. (Two years of verified experience in the irrigation industry may substitute for these courses, per Irrigation Association requirements.)

<b>Competencies and Suggested Objectives</b>
1. Perform a site inspection. <ol style="list-style-type: none"> <li>a. Review site plans.</li> <li>b. Locate irrigation equipment.</li> </ol>
2. Perform a system inspection and tune-up. <ol style="list-style-type: none"> <li>a. Operate and evaluate existing equipment.</li> <li>b. Perform basic repairs to an existing system.</li> </ol>
3. Evaluate system performance. <ol style="list-style-type: none"> <li>a. Gather and analyze data system flow and distribution.</li> <li>b. Identify problems in flow and distribution.</li> <li>c. Develop a solution to observed problems.</li> </ol>
4. Implement a base watering schedule focusing on water conservation.

## STANDARDS

### *Certification Standards for the Irrigation Association’s Certified Irrigation Auditor Exam*

- IR1 Apply irrigation audit procedures and technology.
- IR2 Develop base schedules and scheduling for irrigation.
- IR3 Apply irrigation terminology.
- IR4 Apply soil characteristics and properties to irrigation systems and scheduling.
- IR5 Apply principles of irrigation management.
- IR6 Apply weather and atmospheric conditions to irrigation systems and scheduling.
- IR7 Apply plant anatomy and physiology to irrigation systems and scheduling.
- IR8 Perform site selection procedures for irrigation audits.
- IR9 Evaluate water use in an irrigation system and schedule.
- IR10 Adjust/modify irrigation schedules.

## Book

Irrigation Association. (2004). *Certified landscape irrigation auditor*. Fairfax, VA: Author.

**Course Name:** Special Problem in Irrigation Management Technology

**Course Abbreviation:** IRM 291(1-3)

**Classification:** Vocational–Technical Elective

**Description:** A course to provide students with an opportunity to utilize skills and knowledge gained in other Irrigation Management Technology courses. The instructor and student work closely together to select a topic and establish criteria for completion of the project. (1–3 sch: 2- to 6-hr lab)

**Prerequisites:** Consent of Instructor

<b>Competencies and Suggested Objectives</b>
1. Develop a written plan that details the activities and projects to be completed. <ol style="list-style-type: none"> <li>a. Use a written plan that details the activities and projects to be completed.</li> <li>b. Perform written occupational objectives in the special problem.</li> </ol>
2. Assess accomplishment of objectives. <ol style="list-style-type: none"> <li>a. Prepare daily written assessments of accomplishment of objectives.</li> <li>b. Present weekly written reports of activities performed and objectives accomplished to the instructor.</li> </ol>
3. Use and follow a set of written guidelines for the special problem. <ol style="list-style-type: none"> <li>a. Develop and follow a set of written guidelines for the special problem.</li> </ol>

## STANDARDS

Specific standards for this course will depend upon the nature of the problem under investigation.

## SUGGESTED REFERENCES

Specific references for use in this course will depend upon the nature of the problem under investigation.

**Course Name:** Supervised Work Experience in Irrigation Management Technology

**Course Abbreviation:** IRM 292(1–6)

**Classification:** Vocational–Technical Core

**Description:** A course that is a cooperative program between industry and education designed to integrate the student’s technical studies with industrial experience. Variable credit is awarded on the basis of one semester hour per 45 industrial contact hours. (1–6 sch: 3- to 18-hr externship)

**Prerequisite:** Consent of instructor and completion of at least one semester of advanced coursework in Irrigation Management Technology

<b>Competencies and Suggested Objectives</b>
1. Follow a set of instructor-written guidelines for the supervised work experience program.
2. Apply skills needed to be a viable member of the workforce. <ol style="list-style-type: none"> <li>a. Prepare a description of skills to be developed in the supervised work experience program.</li> <li>b. Practice skills needed to be a viable member of the workforce.</li> </ol>
3. Practice human relationship skills in the supervised work experience program.
4. Practice positive work habits, responsibilities, and ethics.
5. Develop written occupational objectives in the supervised work experience program.
6. Assess performance of occupational skills. <ol style="list-style-type: none"> <li>a. Prepare daily written assessments of work performance as specified in the occupational objectives.</li> <li>b. Present weekly written reports of activities performed and objectives accomplished to the instructor.</li> </ol>

## STANDARDS

Specific standards for this course will depend upon the nature of the problem under investigation.

## SUGGESTED REFERENCES

Specific references for use in this course will depend upon the nature of the problem under investigation.

**Course Name:** Work-Based Learning I, II, III, IV, V, and VI

**Course Abbreviation:** WBL 191(1–3), WBL 192(1–3), WBL 193(1–3), WBL 291(1–3), WBL 292(1–3), and WBL 293(1–3)

**Classification:** Free Elective

**Description:** A structured worksite learning experience in which the student, program area teacher, Work-Based Learning Coordinator, and worksite supervisor/mentor develop and implement an educational training agreement. Designed to integrate the student’s academic and technical skills into a work environment. Includes regular meetings and seminars with school personnel for supplemental instruction and progress reviews (1–3 sch: 3- to 9-hr externship)

**Prerequisites:** Concurrent enrollment in vocational–technical program area courses

<b>Competencies and Suggested Objectives</b>	
1.	Apply technical skills and related academic knowledge needed to be a viable member of the workforce. <ol style="list-style-type: none"> <li>a. Apply technical skills needed to be a viable member of the workforce.</li> <li>b. Apply skills developed in other related courses in a work-based setting.</li> <li>c. Perform tasks detailed in an educational training agreement at the work setting.</li> </ol>
2.	Apply general workplace skills to include positive work habits and responsibilities necessary for successful employment. <ol style="list-style-type: none"> <li>a. Demonstrate proactive human relationship skills in the work setting to include conflict resolution, team participation, leadership, negotiation, and customer/client service.</li> <li>b. Demonstrate time, materials, and resource management skills.</li> <li>c. Demonstrate critical thinking skills such as problem solving, decision making, and reasoning.</li> <li>d. Demonstrate acquiring, evaluating, organizing, maintaining, interpreting, and communicating information.</li> <li>e. Demonstrate positive work habits and acceptance of responsibilities necessary for successful employment.</li> </ol>

## STANDARDS

Specific standards for this course will depend upon the nature of the problem under investigation.

## SUGGESTED REFERENCES

Specific references for use in this course will depend upon the nature of the problem under investigation.

## Recommended Tools and Equipment

### CAPITALIZED ITEMS

1. Fault locator
2. Line locator
3. Handheld controller
4. Walk behind trencher
5. Riding trencher
6. Irrigation auditor's kit (soil probe, pressure gauge, measuring tape, catch devices and stands) (1 per 4 students)
7. Irrigation pumps (variety)
8. Computer with Internet access and printer (1 per 2 students)
9. Design table with design tools

### NON-CAPITALIZED ITEMS

1. Volt–ohm meter (10)
2. Flow meter (4)
3. Pressure gauges (10)
4. Pitot tubes (10)
5. Circular saw
6. Metal handsaw
7. Hacksaw
8. Reciprocating saw
9. Jigsaw
10. Air angle grinder with 35-ft hose
11. Power grinder
12. Shovel, sharpshooter (4)
13. Shovel, square (4)
14. Shovel, round (4)
15. Shovel, 3-in. trench (4)
16. Shovel, 4-in. trench (4)
17. Shovel, 6-in. trench (4)
18. Picks (4)
19. Student tool kit (1 per 4 students) [pipe wrenches, box-end wrenches, adjustable wrenches, spud wrenches, locking pliers, screwdrivers, ball-peen hammers, claw hammer, open-end wrenches, socket set with handles (3/8 in. and 1/2 in.), wire cutters, etc.]
20. Wire stripper and connector tool
21. Level/transit, laser
22. 100-ft tape (4)
23. 25-ft tape (4)
24. 4-ft masonry level (2)
25. 2-ft carpenter's level (2)
26. Handsaw

27. Pipe cutter
28. Irrigation fittings (controllers, heads, valves, etc.)
29. Ladder, 15-ft extension
30. Ladder, 12-ft extension
31. Ladder, 6-ft step

#### RECOMMENDED INSTRUCTIONAL AIDS

It is recommended that instructors have access to the following items:

1. Microcomputer integrated software package (word processing, spreadsheet, and database)
2. Irrigation System Design software
3. Scientific calculator
4. Digital scanner
5. Digital camera
6. Interactive display board
7. DVD player with monitor
8. LCD projector
9. Notebook computer

## Assessment

This program is assessed using the MS-CPAS. The following blueprint summary contains the courses that are measured when assessing this program. Courses are grouped into *clusters*, and a weight is given to each cluster to determine the number of items needed from each cluster. The numbers of C1s and C2s (item difficulty levels) are also indicated on the blueprint. This blueprint becomes effective Spring 2010.

CLUSTER/COMPETENCY	Level 1 (C1) Number	Level 2 (C2) Number	Total	%
Cluster 1: Introduction and Management IRM 1112 Introduction to Irrigation IRM 2123 Green Industry Cost Estimating	15	7	22	22%
Cluster 2: Auditing and Repair IRM 2312 Irrigation Auditing IRM 1223 Irrigation Troubleshooting and Repair	16	6	22	22%
Cluster 3: Installation IRM 1144 Irrigation Systems Installation I IRM 1243 Irrigation Systems Installation II	24	6	30	30%
Cluster 4: Design and Equipment IRM 1123 Residential Irrigation Design IRM 2233 Irrigation Pumps, Controls, and Relays	20	6	26	26%
<b>TOTAL QUESTIONS:</b>	75	25	100	100%

## Appendix A: Proposed Industry Standards for Certified Landscape Irrigation Auditor<sup>1</sup>

- IR1 Apply irrigation audit procedures and technology.
- IR2 Develop base schedules and scheduling for irrigation.
- IR3 Apply irrigation terminology.
- IR4 Apply soil characteristics and properties to irrigation systems and scheduling.
- IR5 Apply principles of irrigation management.
- IR6 Apply weather and atmospheric conditions to irrigation systems and scheduling.
- IR7 Apply plant anatomy and physiology to irrigation systems and scheduling.
- IR8 Perform site selection procedures for irrigation audits.
- IR9 Evaluate water use in an irrigation system and schedule.
- IR10 Adjust/modify irrigation schedules

---

<sup>1</sup> Proposed standards for Irrigation Management Technology are based on the certification process for Certified Landscape Irrigation Auditor as granted by the Irrigation Association. More information on the association's certification process can be found at [www.irrigation.org/certification](http://www.irrigation.org/certification).

## Appendix B: Related Academic Standards<sup>2</sup>

### Reading

- R1 Interpret Graphic Information (forms, maps, reference sources)
- R2 Words in Context (same and opposite meaning)
- R3 Recall Information (details, sequence)
- R4 Construct Meaning (main idea, summary and paraphrase, compare and contrast, cause and effect)
- R5 Evaluate and Extend Meaning (fact and opinion, predict outcomes, point of view)

### Mathematics Computation

- M1 Addition of Whole Numbers (no regrouping, regrouping)
- M2 Subtraction of Whole Numbers (no regrouping, regrouping)
- M3 Multiplication of Whole Numbers (no regrouping, regrouping)
- M4 Division of Whole Numbers (no remainder, remainder)
- M5 Decimals (addition, subtraction, multiplication, division)
- M6 Fractions (addition, subtraction, multiplication, division)
- M7 Integers (addition, subtraction, multiplication, division)
- M8 Percents
- M9 Algebraic Operations

### Applied Mathematics

- A1 Numeration (ordering, place value, scientific notation)
- A2 Number Theory (ratio, proportion)
- A3 Data Interpretation (graph, table, chart, diagram)
- A4 Pre-Algebra and Algebra (equations, inequality)
- A5 Measurement (money, time, temperature, length, area, volume)
- A6 Geometry (angles, Pythagorean theory)
- A7 Computation in Context (whole numbers, decimals, fractions, algebraic operations)
- A8 Estimation (rounding, estimation)

### Language

- L1 Usage (pronoun, tense, subject–verb agreement, adjective, adverb)
- L2 Sentence Formation (fragments, run-on, clarity)
- L3 Paragraph Development (topic sentence, supporting sentence, sequence)
- L4 Capitalization (proper noun, titles)
- L5 Punctuation (comma, semicolon)
